

Romania Business Seminar

～ Romania – 25 years of market economy ～

Romania, located in the South-Eastern part of Europe, has started 25 years ago, after the December 1989 revolution, that overthrown the communist regime, to build a democratic state and a market economy. It became a member of the European Union in 2007 and it is consolidating its presence as a state with an important industrial base. Romania is an important manufacturing base for Europe and the neighboring markets, many Japanese companies expanding their business there.

This seminar will feature speakers that will present their views on Romanian business environment (the economic situation, investment opportunities, the experience of the Japanese countries who already ventured into the Romanian market, etc.) and the important ties between Romania and Japan.

This is a great opportunity to gain the latest information for anybody looking to expanding their business to Romania. We hope that you will enjoy this seminar.
